- Tailwind CSS
- Material UI
- Responsive Design
- REST API Integration
- Python (Django)
- PHP (CodeIgniter)
- PostgreSQL / MySQL
- Git & GitHub
- Vercel

PROFILE

Software Developer with 3+ years of experience designing and building scalable, real-time web applications using React.js and modern JavaScript (ES6+). Proven expertise in developing data-driven interfaces with REST APIs and WebSocket integration, along with backend development using Django REST Framework and PHP. Delivered production-ready solutions across high-impact domains, including healthcare and emergency response systems, with a strong focus on performance, scalability, and clean architecture.

WORK EXPERIENCE

Spero Healthcare Innovation, Pune

SEPT 2023 – PRESENT

CAD – Computer-Aided Dispatch System

- Developed real-time dashboards supporting **4+ large-scale EMS deployments** for live operational decision-making.
- Integrated **REST APIs** and **WebSockets** for real-time ambulance tracking, dispatch updates, and performance monitoring.
- Contributed to backend development using **Django and Django REST Framework** for authentication and data services.
- Designed scalable frontend architecture to handle **high-frequency data streams**, improving performance and stability.
- Built reusable UI components including **role-based access, dynamic filters, and dashboards**.

DMS – Disaster Management System

- Developed responsive modules for **incident management and responder coordination**.
- Implemented real-time tracking using **REST APIs and WebSockets**.
- Resolved UI and workflow issues, improving system reliability and user experience.

ALF – Assisted Living Facility Platform

- Built UI modules and dashboards for **care and administrative workflows**.
- Enhanced admin panel features and compliance workflows.
- Contributed to backend development using **PHP (CodeIgniter)**.

A2Z IT Hub Pvt. Ltd

MAR 2023 – SEPT 2023

- Developed responsive web interfaces using **HTML, CSS, and Bootstrap**.
- Implemented CRUD operations using **PHP (CodeIgniter) and MySQL**.
- Applied **MVC architecture principles** to build structured full-stack applications.
